

Algimycin™ 2000 algaecide

This is the one algaecide that does it all. **Algimycin™ 2000** algaecide kills, prevents and controls all algae types. A special wetting agent penetrates and kills even deeply-rooted algae cells. This nonmetallic, poly-complex formula gives fast and effective control with no foaming or staining. It also acts as a clarifier and filter aid by removing algae fast. If used weekly, it prevents algae outbreaks in the pool.

Algimycin™ 2000 algaecide is also part of our *No Algae. Guaranteed. Program* which guarantees an algae-free pool all season long if a **GLB™ sanitizer**, **Algimycin™ 2000** and **Oxy-Brite™ shock oxidizer** are used as part of the regular pool maintenance program.

Features:

- Effective against ALL algae types
- Contains no stain or water-coloring metals
 - Fast & effective
 - Non-foaming
- Does not irritate skin
 - Will not harm liners
- Eliminates the need to use more than one algaecide

Applications:

Initial Dosage to Prevent Algae:

Add 8-12 oz. per 10,000 gallons.

Maintenance Dosage (weekly):

Add 4-8 oz. per 10,000 gallons.

To Treat Existing Yellow or Green Algae:

Add 16-24 oz. per 10,000 gallons to a pail of water and distribute.

Initial Dosage to Treat Black Algae:

Add 16 oz. per 10,000 gallons to a pail of water and distribute. Brush spots daily.

Sizes:

32 oz.
1 gal.

Tips:

It is easier to prevent algae growth than to destroy established algae. To be most effective against existing algae, add on a warm, sunny day in the morning. Remove dead settled algae by vacuuming.

Compatible With:

Chlorine, bromine, ozone, salt water pools and biguanide sanitizers.

Advantage:

In addition to being a powerful all-purpose algaecide, **Algimycin™ 2000** algaecide stands out above the rest with a special wetting agent that penetrates and kills even deeply rooted algae and a unique clarifier and filter aid that removes dead and living algae fast with concentrated coagulants.
